

Household Hazardous Waste Update

Protecting the Environment of Mission Viejo

The average household contains between three and ten gallons of materials that are potentially hazardous to human health or the environment. Household cleaners, solvents, paint products, pesticides, automotive products and many other chemicals can create health and environmental problems when disposed of improperly.

What is Improper?

By disposing of waste in the:

- **Sewer System** – Damage to pipes or treatment facilities can occur.
- **Storm Drains** – Contaminates waterways.
- **Trash** – Refuse workers may be injured or become ill from handling waste.

Tips for the Future...

- Buy the least toxic products available.
- Buy only as much as you will use.
- Use nontoxic substitutes.

To help prevent the improper disposal of potentially hazardous household products, residents of Mission Viejo can utilize the following methods:
