At least 50% of the total rated wattage of permanently installed luminaires in the kitchen must be in luminaires that are high efficacy luminaires as defined in Table 150-C. Luminaires that are not high efficacy must be switched separately.

**Kitchen Lighting Schedule.** Provide the following information for all luminaires to be installed in kitchens.

**Rules for Determining Residential Kitchen Luminaire Wattage**

**Screw Base Sockets §130(c) 1**
(Not containing permanently installed ballasts) The maximum relamping rated wattage of the luminaire, as listed on a permanent factory-installed label (luminaire wattage is not based on type or wattage of lamp that is used).

**Permanently or Remotely Installed Ballasts §130(c) 2**
The operating input wattage of the rated lamp/ballast combination based on values published in manufacturer’s catalogs based on independent testing lab reports.

**Line Voltage Track Lighting (90 through 480 volts) §130(c) 3**
1. Volt-ampere (VA) rating of the branch circuit(s) feeding the tracks; or
2. For tracks equipped with an integral current limiter, the higher of;
   • The wattage (or VA) rating of an approved integral current limiter controlling the track system or
   • 15 watts per linear foot of the track; or
3. For tracks without an integral current limiter, the higher of;
   • 45 W per linear foot of the track or
   • The total wattage of all of the luminaires included in the system.

**Low Voltage Track Lighting (less than 90 volts) §130(c) 4**
Rated wattage of the transformer feeding the system, as shown on a permanent factory-installed label

**Other Lighting §130(c) 5**
(Lighting systems that are not addressed in §130 (c) 1-4) The maximum rated wattage, or operating input wattage of the system, listed on a permanent factory installed label, or published in manufacturer’s catalogs, based on independent testing lab reports.

**EXAMPLE**
