

Capital Improvement Projects

The City has identified several capital improvement projects which are currently under review for prioritization by the Community Services Commission, which will make a recommendation to the City Council. The hope is to have a prioritized list of projects ready to go as funding becomes available. There is no timeframe in which these projects will be completed.

The Community Services Commission will develop and vote on a prioritized list at its regularly scheduled Tuesday, March 19 meeting held at 6pm at City Hall. People who have questions or want to provide input should attend this meeting or contact the Recreation & Community Services Department in advance at RCS@cityofmissionviejo.org or 949-470-3061.
