You are invited to help us celebrate National Water Safety Month. With the popularity of swimming and other water-related recreational activities and the ongoing need for public education on safer water practices, the month of May is designated as National Water Safety Month.

The designation will be celebrated through educational programs aimed at children, families and the public here in Mission Viejo. Please check back each week to view new links on this page that will highlight and educate about the importance of water safety.

#Drowningispreventable

Click on the link below and read along with your children about Water Safety with “Josh the Otter.”
